High Penetration, Low Fuel Costs & Trouble Free

Sustainable Productivity

Atlas Copco

Aesthetically Superior

Light weight (4300 kgs),
closed door operation
and less noise

Safety First

Heat protection and quality
cladding around the exhaust
which is placed at a
safe height

Easy Accessibility

All service points accessible
through one door.
Air Filter, Separator Element,
and Oil Filters easily replaceable

User Friendly

Radiator and Oil Cooler in a
single panel and kept side by side.
Light weight, compact and
easy to clean / service. Designed
for 50°C ambient

Spacious Canopy

Spacious canopy enables
easy serviceability,
& less number of hoses
reduce maintenance cost

Power Packed Engine

Cummins NTA-855-BC engine
with 417 HP

XR (H/V) (1000 to 1200 cfm) **EXCEL**

Drill More. Get More.

Atlas Copco is the one of the leading manufacturers of portable compressed air machines in the world. Used in a wide variety of industries, Atlas Copco has developed a set of machines that successfully walk the line between size, output and capacity.

The demand for high pressure compressors continues to rise. These compressors are particularly adapted for deep water well drilling under harsh conditions. The frame is rugged and built to last. It is perfect for building sites, both in helping lay the foundations of buildings, and ground consolidation, in addition to pipeline cleaning.

- Performance
- Versatility
- Service Efficiency
- Transport Efficiency
- Resale Value
- Safety

Enduring Performance

Compressor oil capacity of 67 liters.
Synthetic oil increases the life of screw elements, improves compression and have longer replacement interval

Compact Storage

Provision for keeping all maintenance, parts manuals, service reports and key in a compact box

Easy Access

Door enabling easy access for replacement of Fan Belt, cleaning of Radiator & Oil Cooler

Operator Panel

The Panel has all important gauges including inter-stage pressure and inter-stage temperature gauges

Unique Design

Unique un-loader design lowers engine rpm during partial load by keeping air intake fully open. Hence fuel consumption is low at partial load

Superior Technology

Efficient asymmetrical screw profile
